INDUSTRY AND OPERATIONAL RISKS

The Company is subject to a number of risks and uncertainties, the more significant of which are discussed below. Additional risks and uncertainties not presently known to the Company may impact the Company's financial results in the future.

Financing Risks

Being a junior mining exploration company in Canada means that the Company must raise the necessary financings for future exploration. Those financings depend on commodity price trends, general investment sentiment for companies in the sector and the ability of the Company's ability to find and confirm the existence of minerals in sufficient quantities and qualities on its exploration lands. Management acknowledges that these risks are consistent and shared by their peers in the industry.

The Company will require additional financing to conduct exploration on its mineral properties and to fund General and Administration costs. There is no assurance that the Company will be able to raise the required financing through equity financings, debt financings, divestment of its properties or joint venture arrangements. A lack of financing in the future could cause the Company to reduce or postpone exploration spending, reduce exploration and corporate personnel, reduce the size of its mineral property ownership and create going concern issues for the Company.

General Economic Risks

As the Company continues to focus on its exploration in Canada, the operations will be subject to economic, political and social risks inherent in doing business in Canada. The risks come from matters based on policies of the government, economic conditions, changes in tax regime, changes in regulation, foreign exchange fluctuations and other factors that may change in the future.

Environmental Risks

All phases of the Company's operations are subject to environmental regulations and potentially social licensing in the jurisdictions it operates in. World-wide environmental regulation is changing to require stricter standards and enforcement, increased fines for non-compliance, more assessment for projects, and a heightened degree of responsibility for companies and their officers, directors, employees and consultants. Although the company believes that it has taken the proper steps to protect the environment related to its operations, there is no assurance that future changes in environmental regulation in Canada will not adversely affect the Company's operations or result in substantial costs and liabilities in the future.

Aboriginal Claims Risks

Aboriginal peoples have claimed aboriginal title and rights to portions of Canada. The Company is not aware that any claims have been made in respect of its properties and assets; however, if a claim arose and was successful, such claim may have a material adverse effect on the Company's business, financial condition, results of operations and prospects.

Forward-looking statements

Certain information set forth in this MD&A, including management's assessment of the Company's future plans and operations, contains forward-looking statements, which are based on the Company's current internal expectations, estimates, projections, assumptions and beliefs, which may prove to be incorrect. Some of the forward-looking statements may be identified by words such as "expects", "anticipates", "believes", "projects", "plans" and similar expressions. These statements are not a guarantee of future performance and undue reliance should not be placed on them. Such forward-looking statements necessarily involve known and unknown risks and uncertainties, which may cause the Company's actual performance and financial results in future periods to differ materially from any projections of future performance or results expressed or implied by such forward-looking statements. The Company is a mineral exploration company and is exposed to a number of risks and uncertainties that are common to companies in the same business. These risks and uncertainties include, among other things, the speculative nature of mineral exploration and development activities, the Company's need for additional funding to continue its exploration efforts, operating hazards and risks incidental to mineral exploration, the Company's properties are in the exploration stage only and do not contain a known body of commercial ore, uncertainties associated with title to mineral properties, changes in general economic, market and business conditions; competition for, among other things, capital, acquisitions of mineral properties and skilled personnel; ability to obtain required mine licenses, mine permits and regulatory approvals required to proceed with mining operations; ability to comply with current and future environmental and other laws; actions by governmental or regulatory authorities including increasing taxes and changes in other regulations; and the occurrence of unexpected events involved in mineral exploration, development and production.

Management Discussion & Analysis
For the three months ended July 31, 2020

- incurring exploration expenditures of \$15,000 by December 1st, 2020;
- the Company issuing 75,000 common shares of the Company (the “Shares”) to the Optionor within 20 days of the date upon which the TSX Venture Exchange approves the Option Agreement;

The Option will be fully exercised, and the Company will accordingly earn a 100% undivided interest in the NZOU Property, upon the Company issuing 100,000 Shares to the Optionor by December 31st, 2025.

Following the exercise of the Option, the Optionor will be granted a royalty on the NZOU Property (the “Royalty”), being equal to 2.0% of Net Smelter Returns on the NZOU Property. DLP will be entitled at any time and from time to time to purchase up to 50% of the Royalty (being equal to 1.0% of Net Smelter Returns on the NZOU Property) from the Optionor at a purchase price of C\$1,000,000.

The Company may, at its option, accelerate the cash payments and issuances of the Shares described above in order to fully exercise the Option prior to December 31st, 2025.

3. Acceleration of warrant expiry date

The Company announced on September 8, 2020, that the expiry date for the warrants issued on November 14, 2019, with regard to its non-brokered private placement (see news releases dated September 26, 2019 and November 15, 2019), has been accelerated to 30 days from September 8, 2020 (for a new Expiry Date of October 8, 2020). The acceleration of the Expiry Date is due to a Trigger Event (as defined in the Warrant certificates), which occurred due to the price of the common shares being equal to or greater than \$0.25 for a period of 20 consecutive trading days, thereby automatically accelerating the Expiry Date of the Warrants. The Trigger event was disclosed in the private placement’s news release of September 26, 2019 and in the respective Warrant certificates. The Warrants that are unexercised will expire and be of no further value at 4:30 p.m. PDT on October 8, 2020.

Exercise Price	Number and Date of Warrants issued	Accelerated Expiry Date
